EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. CSE	Vellore Institute of Technology Amaravati	7.96	2022-26
Senior Secondary	Sri Chaitanya Junior College	76.4%	2020-22
Secondary	Flora English Medium School	99.6%	2020

TECHNICAL SKILLS

- **Programming**: Java,Python
- **Development**: HTML, CSS, JavaScript
- **Databases**: MySQL
- **CS Subjects**: Data structures and Algorithms, OOPs concepts, Operating systems
- **AI & Machine learning**-Deep learning(CNN,RNN,LSTM,GRU),Natural Language Processing,Large Language Models, Tensor flow,Keras,SCIKIT-Learn

PROJECTS

- **AI Powered Skin Disease Detection:**
- Machine learning and Front end Project
  - Designed and implemented a multi-class skin disease classification system using EfficientNetB0 transfer learning.
  - Built a real-time inference pipeline enabling automated and fast disease prediction.
  - Trained the model on 1,265 dermatological images, achieving high classification accuracy.
  - Made using: VS code, Python,Html,Css and Javascript
- **Urban Sound Analysis :**
- Deep learning project
  - Developed an end-to-end audio classification system using the UrbanSound8K dataset to accurately categorize 10 environmental sound types, including sirens, dog barks, and car horns.
  - Engineered advanced audio features by extracting MFCCs and spectrograms, significantly enhancing the model's ability to distinguish complex acoustic patterns.
  - Made using: Jupyter Notebook,python
- **Early Prediction of Chronic Kidney Disease :**
- Machine Learning Project
  - Designed a machine learning model to predict Chronic Kidney Disease using patient health metrics.
  - Performed data cleaning, feature selection, and normalization to improve prediction quality.
  - Supported early diagnosis and clinical decision-making through predictive modeling.
  - Made using: Jupyter Notebook,python

CERTIFICATIONS

- **Artificial Intelligence with TensorFlow**: Completed certification project on Early Prediction of Chronic Kidney Disease using Machine Learning (2024)
- **Udemy**-Html and Css

  Oracle Cloud-Oracle Generative AI

  Gemini for Google Workspace-**Simplelearn in collaboration with Google**

  Introduction to Generative AI-**Simplelearn in collaboration with Google**

POSITIONS OF RESPONSIBILITV

- **Core Committe Member**, Cultural Fest - Provided leadership in event planning, team coordination *March 2025*

PROFESSIONAL SUMMARY

Software Developer skilled in Java,python and Deep Learning. Experienced in building scalable web applications and deploying machine learning models for real-world use.
